Some of the E-911 configurations require Microsoft Server Licenses, ESRI GIS Software licenses or other possible software licenses covered by other ITS Express Products Lists. Additionally, there are some hardware components proposed as part of the E-911 systems that could be used in other settings, such as servers, desktops, printers, switches, racks, and monitors. These items are only approved on the E-911 PSAP Express Products List 3748 to be used in the PSAP environment. ITS excludes the authorization to purchase such software and hardware from the E-911 # 3748 vendors if said items are not intended for use as part of the PSAP system.
